# INSTRUCTIONS FOR PREPARATION OF MANUSCRIPTS FOR DIRECT REPRODUCTION

IMMUNOLOGICAL COMMUNICATIONS is a bi-monthly journal in the English language for the rapid communication of immunological information.

## Instructions for Submission to IMMUNOLOGICAL COMMUNICATIONS

One manuscript suitable for direct reproduction (see Instructions for Preparation), carefully inserted in a folder, and two copies of the manuscript must be submitted.

### Reprints

Due to the short production time for articles in this journal it is essential to indicate the number of reprints desired upon notification of acceptance of the manuscript. Reprints are available in quantities of 100 and multiples thereof, in addition to the twenty (20) free copies provided to the author(s); a reprint price list will be sent to the author(s) with the notification of acceptance of the manuscript.

### Manuscripts should be mailed to:

Editorial Office, The Center for Immunology  
103 Sherman Hall, School of Medicine  
State University of New York at Buffalo  
Buffalo, New York 14214

## INSTRUCTIONS FOR THE PREPARATION OF MANUSCRIPTS

Since all the contributions are reproduced by direct photography of the manuscripts, the following instructions must be strictly adhered to. Non-compliance result in the return of the manuscript to the author(s) delay in its publication.

### Writing Instructions

Manuscript must be typewritten, double spaced, on good quality white bond paper measuring at least 8½ x 11 inches.

It is essential to use a black typewriter ribbon in good condition so that a clean and clear impression of the letters is obtained. Erasure marks, smudges, creases, etc., should be avoided. (Errors may be corrected by using white opaque correcting fluids or tapes).

All formulas and equations should be typed in or carefully prepared in permanent black ink, using drawing instruments.

The typing area of page 1, including the title, should be 6¼ by 8½ inches and that of all other pages 6¼ x 9½ inches. Make maximum use of the typing area.

Tables should be typed as part of the text but in such a way as to separate them from the text by a three-line space at both top and bottom of each table. The title "TABLE" (capitalized and followed by a Roman number) should precede the table and be centered on the page. Care should be taken that a table does not overlap onto the next page.

Drawings, graphs and other numbered figures should be drawn in black India ink (do not use blue ink) on a separate piece of white paper. Photographs should be glossy prints. Lettering set should be used for all labels on the figures or photographs; a typewriter may be used for labels. Captions for the figures should be

typed (single spaced) on a separate sheet, along the full width of the type page. The indication "FIGURE" should be capitalized and, with the figure's number (in Arabic numerals), centered above the caption. The numbers of the figures or photographs as well as the name(s) of the author(s) should be written in blue pencil on the back; the top of the picture should also be indicated on the back. The author(s) should indicate (with a blue pencil) the places in the text where the picture(s) should be inserted.

- References (including footnotes) in the text will be numbered consecutively by numbers in parentheses. The full references (and footnotes) will be collected at the end of the text. The last names of all authors to any one paper, followed by their initials, shall be quoted. The title of the journal (Chemical Abstracts abbreviations), the volume number (underlined), the first page and the year should follow, in that order. Books should be cited similarly and include the publisher's name and location along with the year and edition of the book. Articles or chapters in books should be cited similarly and include the name of the editor(s) of the book and the page on which the article begins, as well as the volume number.

(journal): Thrasher, S. G., Doroszczak, N. and Cohen, S., J. Immun., 107:1394, 1971.

(book): Pressman, D. and Grossberg, A. L., The Structural Basis of Antibody Specificity. W. A. Benjamin, Inc., New York, 1968.

(article in a book): Milgrom, F., in International Convocation on Immunology, edited by N. R. Rose and F. Milgrom, p. 270, S. Karger, New York, 1969.

### Format of Manuscripts

- The entire title should be in capital letters and centered on the width of the typing area, at least two inches from the top of the page. This is followed by a one-line space and then by the name(s) and address(es) of the author(s), in the following way:

#### AUTOIMMUNE RESPONSES TO THYROGLOBULIN IN THE RAT

T. J. Atkins and H. Z. Ginsberg  
Departments of Microbiology and Pathology,  
School of Medicine, State University of New York  
at Buffalo, Buffalo, New York 14214

- The title and the name and address of the author(s) are followed, after a three-line space, by an abstract, comprising less than 10% of the length of the text of the article. The abstract must be typed single-spaced and headed "Abstract".
- After a three-line space, the article itself commences, whenever possible subdivided into sections such as "Materials and Methods," "Results," "Discussion," "Acknowledgments" and "References." The headings should be centered, underlined, and separated by one extra line space from the typed material that precedes and follows it.
- Each page of manuscript should be numbered lightly at the bottom of the sheet, with a blue pencil.
